

Nutrafeed Soluble Fertiliser for Close Planted Apples

Tree spacing: 4m x 2m

Tree population per hectare: 1,250

NOTES:

Young Non-Bearing Trees - Up to 4 years old

NUTRAFEED 23 @ 278 kg/ha per year of tree age.

Apply from October until the end of April (222g per tree, over a period of 26-27 weeks).

- Split the total amount to match the irrigation cycle (weekly/fortnightly).
- Cycle of crop growth and timing of nutrient application will vary with season, orchard location and variety.
- Routine soil and leaf analysis is necessary for a more specific idea of nutrient levels required.

Mature Bearing Trees

Solid Sidedressing: Apply 400 kg/ha of Patons NO 19 + Mg during July/August banded in the root zone area of the trees (320g per tree).

This is a general recommendation only and as such should only be used as a guide.

Fertigation:

1. NUTRAFEED 23 @ 500kg/ha.
Apply from September until mid-December (400g per tree over a period of 14 weeks).

2. NUTRAFEED 23 @ 250kg/ha.
Apply from mid-December until end of February (200g per tree over a period of 10 weeks).

3. NUTRAFEED 23 @ 150kg/ha.
Apply from beginning of March until end of April as the nitrogen applied assists in the build up of tree reserves for the following Spring shoot growth. (120g per tree)
