

Nutrafeed Soluble Fertilisers for Container Plant Nurseries

Container plants are those grown in a limited soil volume. Typical container types include tubes, trays, pots and punnets. Growing media in these containers is constantly being leached of nutrients. These nutrients need to be replaced. Regular applications of Flowfeed will provide a readily available supply of nutrients.

There are four products specifically designed for containerised nursery use:

Nutrafeed 20

High Nitrogen and Potassium, zero Phosphorus. Ideal for Australia natives.

Nutrafeed 23

Applied to all foliage plants: ornamentals, palms, fruit trees, and vegetable seedlings during periods of increased growth. NUTRAFEED 23 has a marked effect on both vigour and colour of foliage.

Nutrafeed Kestrel

Recommended for all flowering, fruiting and succulent plants. NUTRAFEED KESTREL complements the use of NUTRAFEED 23 in that it hardens all types of plants, making them more resistant to cold weather.

	NUTRAFEED 20	NUTRAFEED 23	NUTRAFEED KESTREL
N	24	23.9	14.1
P	0	4	4.8
K	23.7	19	22.8
S	1.4	0	4.7
Fe	0.04	0.034	0.12
Mn	0.02	0.017	0.093
Zn	0.003	0.006	0.042
B	0.004	0.0088	0.041
Cu	0.002	0.017	0.014
Mo	0.001	0.00023	0.004

Recommendations for Professional Growers

It is recommended to use NUTRAFEED concentrations up to 1g/L (0.1% solution) on containerised plants.

Recommendations are tailored to meet plant requirements over two seasons. The SUMMER season in mid-Winter to mid-Autumn, and the WINTER season from mid-Autumn to mid-Winter.

Note:

NUTRAFEED is not compatible with calcium nitrate and this should therefore be applied separately.

Increase rates by 25% for field grown nursery plants. In any case, concentration of the final solution should never exceed 5g/L (0.5%).

Reduce rates by 50% for:

- Plants grown in media which contains slow release nutrients or complete N:P:K fertilizers in the base mix.
- Newly transplanted nursery stock.

The above recommendations are provided in good faith and are given without liability for loss or damage suffered as a result of their application.

Further Information
