

Nutrafeed Soluble Fertilisers for Close Planted Stonefruit

Tree spacing: 4m x 2m
Tree population per ha: 1,250

Young Trees - (non-bearing)

Year 1: NUTRAFEED 23 @ 88kg/ha (70g / tree).

Apply from beginning of August until end of March (over period of 29-30 weeks).

Year 2: NUTRAFEED 23 @ 160kg/ha (128g / tree).

Application period as above.

Mature Trees - (bearing trees)

1. NUTRAFEED 23 @ 125kg/ha (100g / tree).

Apply from beginning of August until second week in October (over period of 10 weeks).

2. NUTRAFEED KESTREL @ 200kg/ha (160g / tree).

Apply from third week of October until third week of December (over a period of 8 weeks).

3. NUTRAFEED KESTREL @ 116kg/ha (92g / tree).

Apply from fourth week of December until the end of February over a period of 9 - 10 weeks.

4. NUTRAFEED 23 @ 225kg/ha (180g / tree).

Apply from beginning of March until the end of April (over a period of 8 weeks) as the higher nitrogen applied here assists in the build up of tree reserves for the following spring shoot growth.
