

# Nutrafeed Soluble Fertilizers

## NUTRAFEED KESTREL

Patons NUTRAFEED KESTREL is a highly soluble complete fertilizer with trace elements. NUTRAFEED Kestrel is an excellent fertilizer for all plants, and is particularly suited to flowering and fruiting plants.

### USE

Can be used in nurseries, vegetables, lawns, greens and for home gardeners.

Can be applied through fertigation (mixed with water) or as a foliar fertilizer (sprayed on leaves).

### APPLICATION RATES

- Flowers & vegetables - FOLIAR 0.4% soln 4g/L.
- Tomatoes, Eggplant, Capsicums - 3g per plant per week (soil application) before flowering.
- Potted Plants - WITH WATER SOIL APPLICATION 0.1% - 0.2% or 1-2g/L.
- Lawns, greens and turf - WITH WATER SOIL APPLICATION 0.5 - 1kg/100m<sup>2</sup>
- Fruit Trees - Fruit filling / maturing 75 - 100 gms / tree / week.

### Storage:

Store in a sealed container in a cool, dry place.

### Compatibility:

All NUTRAFEED products are compatible with each other. Additional Librel brand chelated elements may be mixed in for the correction of known specific element deficiencies.

Never mix any NUTRAFEED product with Calcium nitrate.

## PRODUCT ANALYSIS

Nitrogen as nitrate	7.3 %
Nitrogen as ammonium	5.0 %
Nitrogen as Lo Bi Urea	2.3 %
<b>Total Nitrogen (N)</b>	<b>14.6 %</b>
<b>Phosphorus (P) as water soluble</b>	<b>5.0 %</b>
Potassium (K) as nitrate	21.0 %
Potassium as sulphate	2.1 %
<b>Total Potassium (K)</b>	<b>23.1 %</b>
Magnesium (Mg)	0.4 %
Iron as (EDTA) chelate	0.04 %
Manganese as (EDTA) chelate	0.02 %
Zinc as (EDTA) chelate	0.003 %
Boron as sodium borates	0.004 %
Copper as (EDTA) chelate	0.002 %
Molybdenum (Mo)	0.001 %

### Important Things to Remember:

- Always water fertilizer in well, immediately after application. Watering should involve a thorough saturation of the area.
  - Avoid direct contact with plant roots, seeds, etc.
  - Even, light and regular applications of a quality product will achieve the best results.
  - Always reseal bags after use and dispose of empty containers properly.
  - Sandy soils will require lower rates of fertilizer but more frequent applications
  - Apply sparingly on potted plants as excessive fertilizer can cause burning relatively easily.
  - It is much safer to apply small amounts on a regular basis.
- Do not exceed the recommended application rates as this can be harmful to plants.
