WEEDER FEEDER

Patons Weeder Feeder provides a quick and economical solution to many Spring Weeds whilst boosting lawn grasses. It does this with its unique combination of Nitrogen, an essential element for leaf growth and Iron which will burn off most germinating spring weeds.

Recommendations:

*Apply 1 kg (Approximately 20 adult handfuls) per 15m².
25 kg of Weeder - Feeder will cover approximately 375 m².*

One adult Handful is approximately 50 grams.

How to Apply

Apply Weeder - Feeder onto wet grass when weather is fine. If rain within 12 hours weed control may be diminished, so repeat application.

DO NOT WATER IN FOR AT LEAST TWO DAYS

The lawn may discolour (blacken) but will recover as the nutrients start working.

Note

Do not apply in hot or windy weather.

Do not apply to lawns such as clover and Dichondra.

Avoid walking on treated area as much as possible for the first few days.

FEATURES & BENEFITS

- Provides Nitrogen which is essential for vigorous growth of lawns.
- "Burns Off" many broadleaf weeds.
- Contains Iron which is an essential nutrient for lawns.

PRODUCT ANALYSIS

Nitrogen	5.0% as ammonium.
Sulphur	8.5 % as Sulphate
Iron	5.0 % as Sulphate
