

Liquid Fertilizers

LIQUID FERR-N

PATONS LIQUIDFERR-NA is a revolutionary foliar fertilizer containing Nitrogen, Iron and Sulphur.. On playing surfaces PATONS LIQUID FERR-N can assist with Nitrogen, Iron and Sulphur deficiencies.. The product can be applied diluted (with water) for aerial or ground application. Use sufficient carrier to adequately cover foliage

Recommendations:

PATONS LIQUID FERR-N may be applied to a wide range of fruit, vegetable, ornamental, greenhouse and broadacre crops to correct a Nitrogen, Iron and Sulphur deficiency. General recommendations appear below.

APPLICATION RATES

- *TURF General 15 - 20 L / ha. r Spray / Drench*
- *.Vegetables 0.5 - 1 l / ha Foliar as required*
- *Broadacre Crops 1 - 2.5 l / ha*
- *Fruit 1 - 2.5 l / ha as required..*

As with all spray treatments sufficient water must be supplied as a carrier to prevent burn.

A mix with water of 1 : 50 - 1 : 100 solution is safe for most crops.

For foliar applications use the higher dilution rate.

FEATURES & BENEFITS

Nitrogen	Promotes rapid greening
Iron	Stimulates plant synthesis of chlorophyll.

PRODUCT ANALYSIS

NITROGEN (N) as Lo Bi urea	14.0%
Iron (Fe) as sulphate	13.1%
Sulphur (S) as sulphate	7.3%

Caution- *Sufficient water should be used with any foliar application to prevent burn. Do not spray other than early morning or late afternoon..*
