

Horticulture News

Issue 2, Spring 2007

Spring 2007

With good rainfalls in many areas over the Winter months, it is looking positive for a long overdue busy Spring. In this edition of Horticulture News, we look at the latest in what is happening at Paton Fertilizers and Fertico.

Spring Orders

With the recent wet weather Spring seems to be starting a little earlier. Please try to get your orders in early to ensure we can fill your order as soon as possible. We have been busy building up stock over the cooler months so there should be plenty of stock ready to go.

Mother Earth—Granulated Organic Fertiliser

Mother Earth is available ready for the spring season. Many customers have reported that they have been getting excellent results with this low cost organic based fertiliser. Mother Earth has a great environmental story in that it is produced in the process of making "green" electricity from waste food products. We are now also able to offer Mother Earth + Pedocare which provides the benefits of Mother Earth fertiliser with the additional water saving properties of Pedocare. Mother Earth is available in 20kg or 35kg bags. See your pricelist or the Paton website for more details of this product.

Paton Website

The Paton website is in the process of being updated. You may have noticed some changes already. We are aiming at having a new look easy to navigate website by early Spring. Check it out with the link below.

www.paton.com.au

Horticulture Research

Paton Fertilizers has an extensive research reference on a variety of different topics regarding Horticulture. There is a large amount of technical information on the fertiliser products that we stock. To view these pages, please follow the link. [Research Pages](#)

Horticulture Fertiliser Recommendations

Paton Fertilizers has a website section dedicated to the fertiliser needs of the most common horticultural crops. This information shows which fertilisers to use, when to use them and how much to apply for different crops. To visit this section, please follow the link below.
