

12-0-36 mini (60-0-60 % Multicote)

Description: Multigreen 12-0-36mini is a controlled release fertilizer that releases nutrients in a balanced and controlled manner. Multigreen 12-0-36 mini is based on Multicote[®] polymer coated fertilizer.

Multigreen 12-0-36 mini is programmed to provide nitrogen and potassium over 4 months, at 21°C (70°F) average soil temperature. The release rate is affected only by the soil temperature. Soil pH, soil type, water content and microbial activity do not affect the release significantly.

Multigreen 12-0-36 mini continuously provides the turf with nitrogen and potassium at a balanced ratio.

Benefits:

- Safe use with no fear of scorching
- Improved efficiency of nutrient uptake
- Reduced application volume
- Reduced leaching and groundwater contamination - ideal for use under rainy conditions

Application Rates:

Nitrogen Level lbs/1000ft ²	Multigreen 12-0-36 lbs/1000ft ²	Multigreen 12-0-36 kg/100m ²
1.0	4.5	2.2
2.0	9	4.4
3.0	13.5	6.6
recommended rate 1.0-2.0 per application	4.5-9.0	2.2-4.4

Coverage: One bag will cover 570-1150 m² at the recommended application rate.

Spreader setting

kg/100m ²	lbs/1000ft ²	Earthway 2400SS	Scott's R8A	Spiker 24-22	Lesco #020093
2.2	4.5	12	J	4.25	F
4.4	9.0	15	M	5.25	H

Note: these settings are approximate. Correction according to the spreader's conditions, walking speed and weather conditions may be required.

Specification:

	unit	coated	uncoated	Total
Total N	%	7.2	4.8	12
NH ₄ -N	%	-	-	-
NO ₃ -N	%	7.2	4.8	12
NH ₂ -N	%	-	-	-
P				
citrate soluble	%	-	-	-
water soluble	%	-	-	-
K	%	21.6	14.4	36

Nutrients are derived from potassium nitrate.

Chlorine free, less than 0.1%

Particle size: 90% between 1-1.7 mm.

Package size: 25 kg

Handling precautions: Harmful if swallowed. Keep out of the reach of children. Store under cool and dry conditions.
